## Introducing David White, ETC's New Safety Professional

We are pleased to welcome David White to ETC! With over 31 years' experience as a safety professional, David is well-versed in Hazardous Materials Response and Training. As a Hazardous materials specialist, he managed a State Response Team for all hazardous materials involving highway, rail and clandestine laboratory operations. In addition, David served as an FMCSA Instructor for all DOT HazMat courses, as well as a Train-the-Trainer for the FMCSA National Training Center.

David will be responsible for the continuation and further development of ETC's HAZWOPER program. He also brings the extensive knowledge to conduct 3<sup>rd</sup> Party DOT Compliance Audits (see page 2) and the mandatory Drug & Alcohol Reasonable Suspicion for Supervisors training.

We hope you'll have the opportunity to work with David and benefit from his expertise.

### Training & Consulting

## Now Offering 3<sup>rd</sup> Party DOT Compliance Audits!

### Should you consider a 3<sup>rd</sup> Party DOT Audit?

In 2016, the FMCSA (Federal Motor Carrier Safety Administration) stated that "five million truck and bus drivers share the road with more than 250 million motorists." That statistic makes the necessity for complying with DOT safety regulations important to each and every one of us!

As a business owner it's difficult to stay on top of all areas of your business all of the time. A 3<sup>rd</sup> Party Audit allows a safety professional to review your DQ files to verify that you're complying with all DOT regulations. Wouldn't you rather have a professional you can trust identify areas in need of improvement instead of a government agency?

### Meet the Safety Professional you can trust...

When we began our search for a new instructor, the qualifications to teach HAZWOPER were our main focus. We were fortunate to not only find someone to fill that need, but also, someone who brings a new expertise to our line-up of services. During David White's career with the Arizona Department of Public Safety and 6 years in the private sector as a Safety Compliance Manager, he has conducted DOT Compliance Audits and associated training and is looking forward to providing these services to ETC's clients.

### Do FMCSA Regulations apply to you?

You are subject to FMCSA regulations if you operate any of the following types of commercial motor vehicles in interstate commerce:

- (1) Has a gross vehicle weight rating or gross combination weight rating, or gross vehicle weight or gross combination weight, of 4,536 kg (10,001 pounds) or more, whichever is greater; or
- (2) Is designed or used to transport more than 8 passengers (including the driver) for compensation; or
- (3) Is designed or used to transport more than 15 passengers, including the driver, and is not used to transport passengers for compensation; or
- (4) Is used in transporting material found by the Secretary of Transportation to be hazardous under 49 U.S.C. 5103 and transported in a quantity requiring placarding under regulations prescribed by the Secretary under 49 CFR, subtitle B, chapter I, subchapter C.

Third party auditing brings fresh eyes and an objective perspective to the auditing process. Why not find out if you are fully in compliance before a Federal or State Safety Investigator shows up on your doorstep? **Contact us today to discuss your DOT Compliance Audit!**

## New Workshop – Hottest Fire Protection Topics

**NEW**

**What's new in fire protection?** Actually, *quite a lot*, and this full-day workshop reviews the hottest topics! Included are:

- ▶ Fire protection for hazardous materials
- ▶ Mitigation of combustible dust hazards
- ▶ 3-D printer exposures
- ▶ New municipal requirements for flammable liquid storage
- ▶ A continuing hot topic includes maintaining fire wall integrity

This workshop utilizes numerous descriptive photographs, shows current fire testing results, and provides forensic examples of things gone wrong within the hot topics. You will become armed with what to watch out for in your daily work.

This class is intended for Industrial and Power Plant personnel such as Safety Directors / Professionals, Facility Managers, Industrial / Plant Engineers and Industrial Fire Chiefs.

## Is Your Facility Vulnerable?

Does your facility store *any* flammable substances?

You probably recognize flammable substances when you see them. You know not to light a match or smoke around them, but what about them being in close proximity to faulty electrical equipment or incompatible hazardous materials? Are the flammable substances stored properly? Is proper placarding enough to keep you, your coworkers and the facility safe?

**Hottest Fire Protection Topics, ETC's** new workshop, is designed to assist your personnel in identifying fire hazards and the ways to mitigate the risk of fire or explosion.

(See page 2 for more details.)

### Does Your Safety Program Still Have a Pulse?

We all know that having a safe workplace is vitally important; but is your company's Safety Program performing as well as it should? Would it benefit from a fresh perspective? ETC Safety Professionals can assist you in evaluating and improving your Safety Program (or assist you in establishing one!).

They begin with a site visit which enables them to fully understand the company's organizational structure and expectations. The needs of each department, in relation to regulatory compliance, are identified and if available, a review of the company's existing safety manual, training documentation and OSHA recordables is conducted. From this information an action plan is developed to address any deficiencies that are found.

In most cases from that point, the Safety Manual is updated (or in some cases, developed!), necessary training is conducted and a plan is put in place for ongoing program management.

Contact us today if you need to develop a Safety Program or want to give your existing one a check-up!
