EHS Solutions Based in Reality

There's no Substitute for REAL Experience

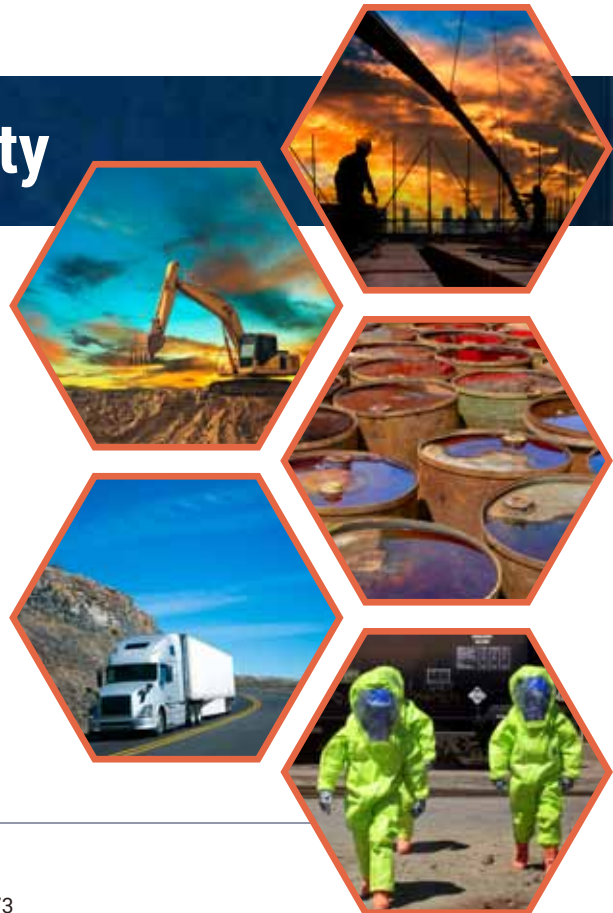

ETC's safety professionals are dedicated industry experts with many years of real-world experience across virtually all aspects of environmental health and safety. This expertise across overlapping industries makes for a strong collaboration allowing ETC to provide customized, dynamic training and consulting services.

Since 1993, we have assisted clients throughout Arizona, the US, Canada, Mexico, South America, Germany and Australia in the areas of *OSHA, MSHA, DOT/IATA, HAZWOPER, RCRA* and *Asbestos*. Our safety professionals have worked in their chosen fields and bring that experience to their training and consulting projects. Our services include:

- ◆ Open Enrollment Training
- ◆ Custom Training – your site or ours
- ◆ Site Audits & Inspections
- ◆ Safety Management Services
- ◆ Safety Program Development/Review
- ◆ Customized Emergency Procedure Guides

Contact us today to discuss your specific EHS challenges!

Practical Solutions, Effective Results

OSHA ♦ MSHA ♦ DOT ♦ EPA

Training & Consulting

What can we do for you?

ETC understands the business owner's perspective and the often-difficult task of doing the right thing while managing the bottom line. Our experience across diverse industries, both public and private, gives us the tools to efficiently assess your environmental, health and safety compliance issues and to recommend an appropriate plan of action to achieve your company's goals, get the job done right, on time and within budget.

If your safety program is missing a few pieces, we can help you put it all together.

✔ **Site Safety Inspection**

A safety inspection is "a comprehensive survey of all or part of a workplace in order to detect safety and health hazards." (osha.gov) Once an ETC safety professional has visited your site and identified hazards, a written report is developed that outlines the potential risks and makes recommendations to minimize or eliminate them.

✔ **Site Safety Audit**

A safety audit evaluates a company's Safety Program and related practices for efficiency, effectiveness and reliability. Audits are conducted by reviewing documentation (safety manual, OSHA 300 logs, training records, etc.), interviewing a variety of personnel and observing the workplace. The results of an audit will assist you in correcting hazards and determining what actions to take to achieve your desired safety goals.

✔ **Training Needs Assessment**

Training needs are often uncovered during both, site inspections (observing behavior) and audits (written training records). A training needs assessment identifies an individual's current level of competency, skill or knowledge in an area and compares it to the required competency standard established by the organization's safety program.

✔ **Job Hazard Analysis (JHA)**

Also known as a Job Safety Analysis (JSA), a JHA is a technique used to identify the hazards of a specific job or process and makes recommendations to minimize or eliminate the hazards. A JHA can be helpful when investigating accidents and training workers on how to safely perform their jobs.

✔ **Safety Manual**

Your company's safety manual should not be sitting on a shelf collecting dust. A quality safety manual should not be generic; it should contain valuable information that

addresses your specific work environment and the regulatory agencies that govern your operations. ETC reviews, updates or develops a company-specific safety manual to provide the foundation and guide for a safety and training program that will promote safety as a value and qualify your company to bid on high-level contracts.

✔ **Emergency Procedure Guide**

An Emergency Procedure Guide contains essential information that your employees need when faced with an emergency. These guides are customized for your company, contain emergency contact names and numbers in an easy to use format that is durable and easily visible.

✔ **Safety / Environmental Management Services**

If your organization values safety and environmental responsibility, yet lacks the budgetary resources for a full-time safety / environmental professional, we may have the answer you've been looking for. Our Safety / Environmental Management Services program is designed to assist organizations in developing and maintaining a high level of safety and environmental awareness. One of our safety professionals will conduct a preliminary site visit, then work with you to develop a detailed plan of action. The plan may require the services of an ETC safety professional a few hours a month or several days a week depending on the amount of work needed to attain compliance, fill the gaps or to boost your company's safety program to the next level.

✔ **Training Options & Documentation**

ETC offers a wide variety of training classes in Phoenix and Tucson or can customize onsite training to fulfill your company-specific requirements. Documentation of training is provided for your records.

Contact us today to discuss how we can assist you in meeting or maintaining regulatory compliance.

HAZWOPER

40-hr General Site Worker

5 days, 8am - 5pm \$595

29 CFR 1910.120 Intended for personnel who are routinely involved in the cleanup and handling of hazardous materials. *Maximize your training by bringing an SDS to class – one used at your facility.*
