# DOT Hazmat Awareness

This course is designed for the employee who is directly involved with hazardous materials transportation safety and procedures, i.e.: anyone who loads, unloads or handles hazardous materials or manufactures, tests, reconditions, repairs, modifies, marks or otherwise represents containers, drums or packaging as qualified for use in the transportation of hazardous materials: prepares hazardous materials transportation documents or operates a vehicle used to transport hazardous materials. Our course has proven to be the hazardous materials training companies can count on to educate its workers.

This one-day class provides an awareness-level knowledge of the transportation of hazardous materials in compliance with Subchapter C of Title 49. Topics covered are: recognition of hazardous materials, hazard communication, familiarization with hazardous materials regulations, emergency response rules, and an overview of the shipping requirements for hazardous materials. This course meets DOT requirements and the UPS Hazmat training mandate.

**For more information, email requests@e-t-c.com.**

**Class Times:**

1 day, 8 am – 5 pm

**\$315.00 per attendee.**

# DOT Hazmat Initial

This course is designed for people who manage and supervise employees responsible for the packaging and shipping of hazardous materials and for employees who are responsible for the packaging and/or shipping of more than one type of product containing different materials. It features an in-depth discussion and review of the DOT 49 CFR regulations governing the transportation of hazardous materials and covers all required subjects except those particular to the individual hazmat employer (i.e., in-depth security or site-specific job functions). Topics include identification of hazardous materials, marking and labeling requirements, shipping paper documentation, placarding requirements, and emergency response rules. Title 49 regulations are used throughout the course. One copy of an enhanced 49 CFR book is provided to each student and is included in the price of the class, a \$200 value. This course meets DOT requirements and the UPS Hazmat training mandate.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**  
2 days, 8 am – 5 pm

**\$625.00 per attendee.**

# DOT Hazmat Refresher

**Prerequisite:** Strong working knowledge of DOT Hazmat Regulations. This 8-hour course is designed to fulfill the 49 CFR 172 Subpart H requirement for recurrent training at least once every three years. Students are updated with regulatory changes, and are given refresher training in the use and application of the 49 CFR manual. Other topics covered include: hazardous materials identification, marking and labeling requirements, shipping paper documentation, placarding requirements, and emergency response rules. A copy of the current Title 49 CFR regulation book is provided in class for reference only. This course meets DOT requirements and the UPS Hazmat training mandate.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

1 day, 8 am – 5 pm

**\$315.00 per attendee.**

## Transport of Hazmat: Air IATA Initial

Learn to classify, mark, pack, label and document dangerous shipments based on international and national air regulations. Prerequisite: Strong working knowledge of DOT Hazmat regulations. Includes current IATA Dangerous Goods Regulations Guide.

A \$295 value.

For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).

**Class Times:**  
2 days, 8 am – 5pm

**\$1,095.00 per attendee.**

## IATA Refresher

Prerequisite: IATA Initial. Current IATA Dangerous Goods Regulations Guide is provided for use during class.

For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).

**Class Times:**  
1 day, 8 am – 5pm

**\$475.00 per attendee.**

# Emergency Management: Emergency Preparedness

Training is presented in accordance with U.S. Department of Homeland Security, FBI, OSHA and the NFPA. There is no single element that can predict a violent act, but when a combination of human factors and behaviors come together, there can be an amplified risk of violence. A key attribute in prevention is situational awareness if you are aware of what's going on around you and can be prepared to react if you perceive a threat. In order to be prepared businesses must have a strategy, employee training, written and communicated policies and procedures. This course, which includes CPR and major bleeding control for non-clinical laypersons and enables you to act in an accident or an active shooter. This training will provide you with the skills and confidence to perform CCR and to help stop major bleeding and a better understanding of how life-threatening bleeding if left untreated can cause death while waiting for the first responders to arrive.

**For more information, email  
[requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

1 day, 8 am – 5 pm

**\$275.00 per attendee.**

## Emergency Management: First Aid, AED, and CPR

Comprehensive first aid, AED and CPR training is not only great for your employees to have, it's also necessary. All modern-day employees working in small and large facilities should have knowledge on what to do in an emergency situation. In this training course, students will learn the basics of just that. At ETC Compliance Solutions, we offer a combined Adult First Aid, CPR and AED certification course that employers trust to educate their employees on proper safety measures and first aid care. If you're looking to offer your employees a comprehensive CPR certification course, you have found the right training.

Our safety pros can certify you through the NSC or HSI.

We offer this course wherever you are! If you're ready to offer your employees the in-depth Adult CPR certification course contact ETC Compliance Solutions today. Our trainings are comprehensive and will equip your team with the knowledge they need in the event of an emergency situation.

Looking for other environmental, health and safety training courses? ETC Compliance Solutions offers OSHA, MSHA, DOT, EPA, RCRA and Asbestos training. We can equip your employees with the knowledge they need on the job site.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**  
1 day: 8am – 4pm

**\$100.00 per attendee.**

# EPA Asbestos Awareness

This 2 – 2 1/2 hour training is designed for individuals who work in areas that contain asbestos containing materials (ACM), but do not disturb them in the course of their work. Topics include a history of asbestos, an overview of the health effects associated with asbestos, types of ACM, the recognition of damaged and deteriorated ACM, proper work practice requirements to avoid the disturbance of ACM, and proper response to fiber release episodes. This course is designed to inform employees who may work in buildings that contain asbestos materials. This certification is obtained by attending the first two to two and a half hours of any initial asbestos course.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

1 day, 8 am – 10:30 am

**\$150.00 per attendee.**

# EPA Asbestos Building Inspector Initial

This course is a requirement for individuals who will investigate public or private buildings for asbestos containing materials (ACM). Course topics include legal considerations associated with environmental investigations, health effects of asbestos exposure, applicable asbestos regulations, inspecting for the presence of ACM, asbestos bulk sampling, assessing the condition of ACM, and writing the asbestos inspection report. Completion of this 3-day course certifies the individual in the identification of suspect materials that may contain asbestos. A written exam with a minimum score of 70% is required.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**  
3 days, 8 am – 5 pm

**\$650.00 per attendee.**

# EPA Asbestos Building Inspector Refresher

This 4-hour annual refresher training for asbestos building inspectors includes a review of topics originally presented in the initial course. This course features a presentation of new developments in government regulations, state-of-the-art work practices, and asbestos abatement industry standards. A copy of the students original asbestos building inspector certification is required for admittance into this class. Refresher Training: Continuation of the AHERA BI certification requires an annual 4-hour refresher.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

1/2 day, 8 am – 12 pm

**\$150.00 per attendee.**

# EPA Asbestos Contractor/Supervisor Initial

This five-day, 40-hour, course is intended for contractors and supervisors of abatement projects and response actions. It covers in detail the work practices, abatement procedures, personal protection, and relevant federal, state, and local regulations that a contractor/supervisor must consider before beginning to design or supervise abatement work. Along with other topics, the course examines insurance, bonding, contract specifications, health effects of asbestos, abatement methods, small-scale/short-duration operations, building containment areas, negative-pressure enclosures, decontamination, and glovebag use. Completion of this course certifies the individual in removal, encapsulation and enclosure of asbestos-containing materials and meets the training requirements for licensing as an abatement supervisor. This certification under OSHA regulations is synonymous with the competent person designation. A written exam with a minimum score of 70% is required.

**For more information, email  
[requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**  
5 days, 8 am – 4 pm

**\$900.00 per attendee.**

# EPA Asbestos Contractor/ Supervisor Refresher

This required 8-hour annual refresher training for asbestos contractor supervisor workers includes a review of topics originally presented in the initial course. This course features a presentation of new developments in government regulations, state-of-the-art work practices and asbestos abatement industry standards. A copy of the student's original asbestos contractor supervisor certification is required for admittance into this class.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

1 day, 8 am – 5 pm

**\$200.00 per attendee.**

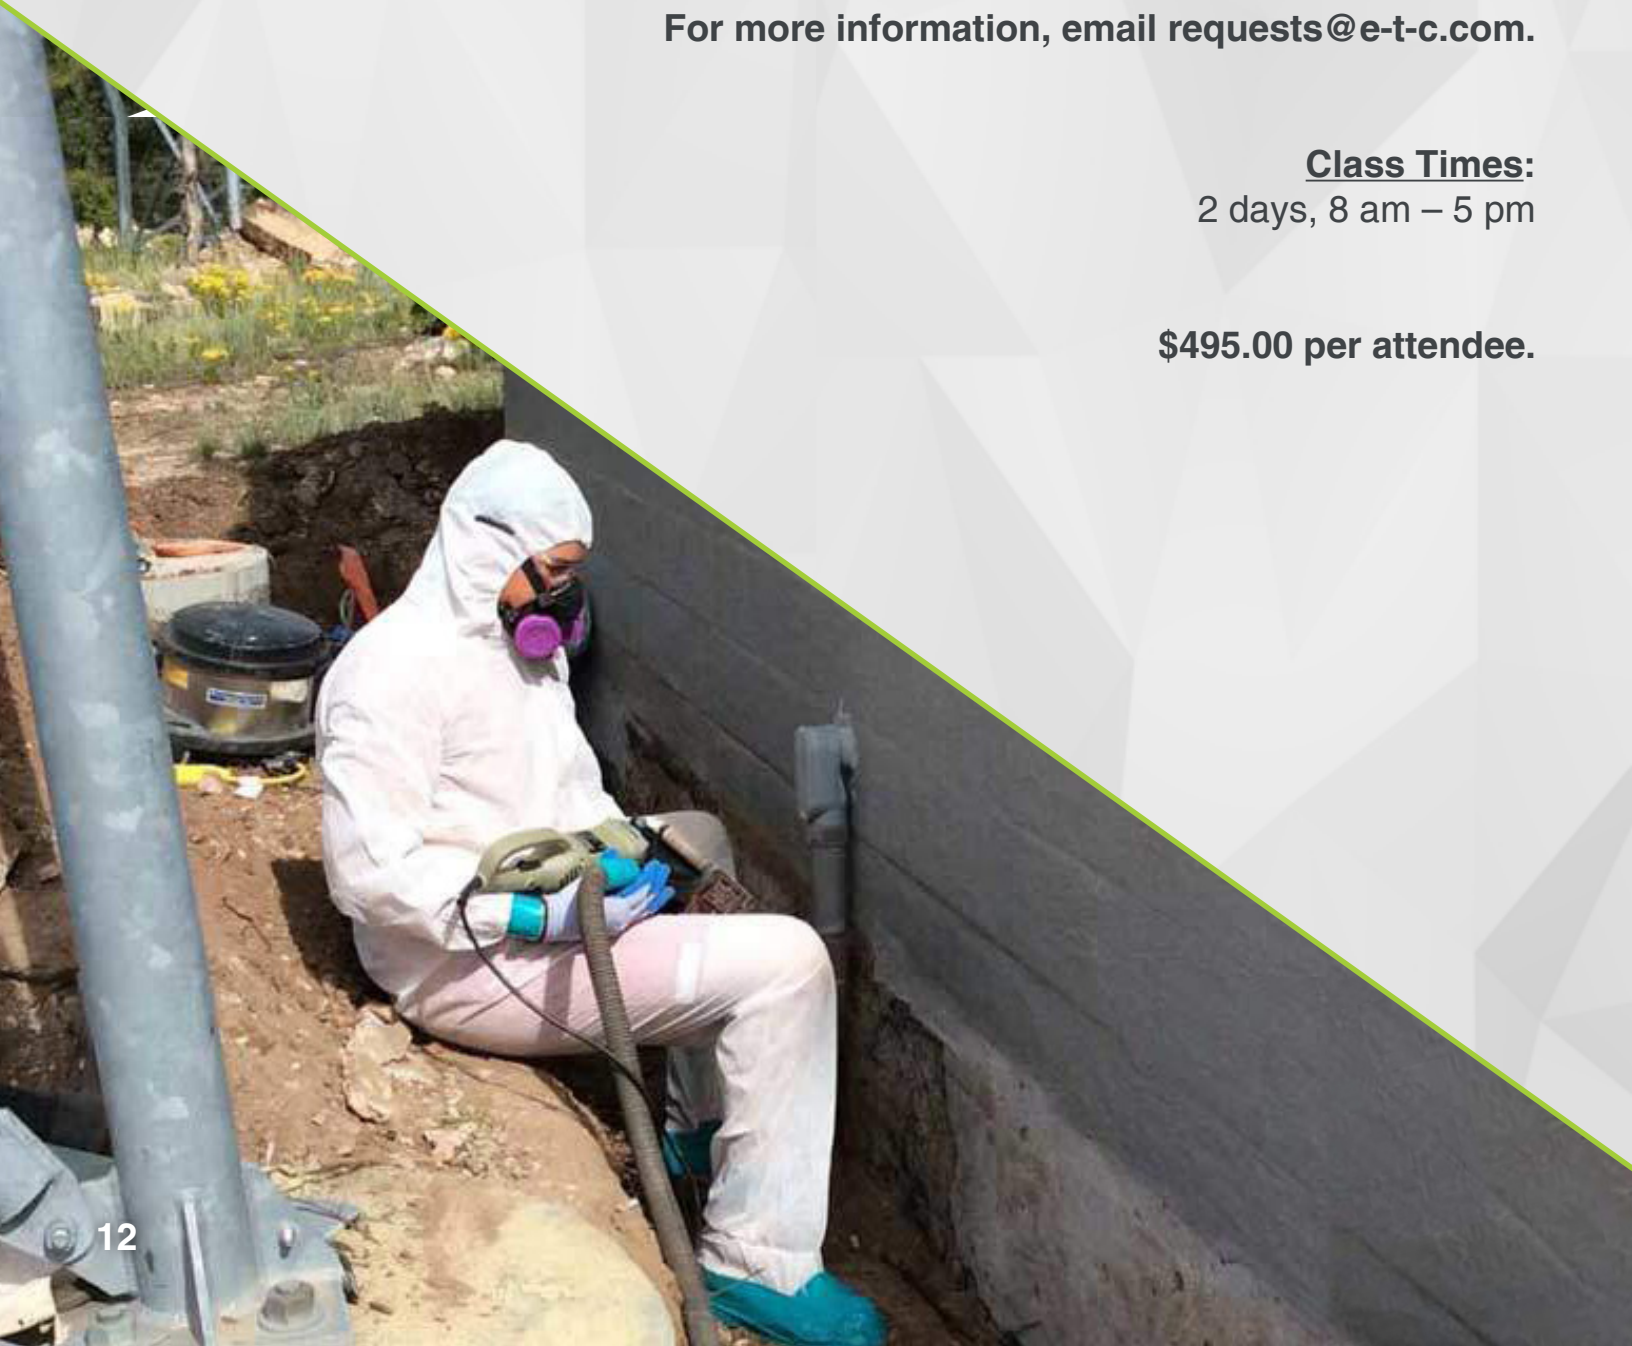

# EPA Asbestos Operations And Maintenance Initial

This 2-day course curriculum package is intended for personnel who will disturb small amounts of asbestos as a result of routine or emergency maintenance or repair work. The course covers health effects, work practices, personal protective equipment, regulations and other topics per EPA and OSHA guidance. The focus is on conducting safe, small scale disturbance of asbestos using appropriate work practices and protective equipment. The O&M Worker meets the OSHA training requirements for Class II, Class III and Class IV asbestos work.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**  
2 days, 8 am – 5 pm

**\$495.00 per attendee.**

# EPA Asbestos Ops & Maintenance Refresher

This 4-hour annual refresher training for asbestos O&M workers includes a review of topics originally presented in the initial course. This course features a presentation of new developments in government regulations, state-of-the-art work practices and asbestos abatement industry standards. A copy of original asbestos operations and maintenance certificate is required for admittance into this class. Refresher Training: Under OSHA, continuation of the O&M certification requires an annual 4-hour refresher.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

1/2 day, 8 am – 12 pm

**\$150.00 per attendee.**

## EPA RCRA Initial

The fundamentals of the Resource Conservation and Recovery Act (RCRA) in compliance with 40 CFR requirements. The seminar covers: RCRA basics, hazardous wastes, waste minimization/source reduction, inspections and self-audits, contingency planning and the latest regulatory updates. A MUST for large quantity generators. Includes “Hazardous Materials, Substances & Waste Compliance Guide.”

This class has been updated to reflect the RCRA Hazardous Waste Generator Improvements Rule. “This final rule includes over 60 changes to hazardous waste generator regulations that clarify existing requirements, increase flexibility, and improve environmental protection.” (EPA Fact Sheet) If you are responsible for RCRA compliance where hazardous waste is generated, stored, recycled, treated or disposed of, this rule will greatly affect you and your company.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

2 days, 8 am – 5 pm

**\$675.00 per attendee.**

# EPA RCRA Annual Refresher

Prerequisite: Strong working knowledge of RCRA Regulations. Refresher on the fundamentals of the Resource Conservation and Recovery Act in compliance with 40 CFR requirements. The STET covers: RCRA basics, hazardous wastes, waste minimization/source reduction, inspections and self-audits, contingency planning and the latest regulatory updates. A MUST for large quantity generators. The current “Hazardous Materials, Substances & Waste Compliance Guide” is provided for use during class.

This class has been updated to reflect the RCRA Hazardous Waste Generator Improvements Rule. “This final rule includes over 60 changes to hazardous waste generator regulations that clarify existing requirements, increase flexibility, and improve environmental protection.” (EPA Fact Sheet) If you are responsible for RCRA compliance where hazardous waste is generated, stored, recycled, treated or disposed of, this rule will greatly affect you and your company.

**For more information, email  
[requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

1 day, 8 am – 5 pm

**\$325.00 per attendee.**

## MSHA Class 24-Hour

If you're looking for in-depth MSHA training course for your new and inexperienced miners, ETC Compliance Solutions is the company for you! Our training courses are always comprehensive, up-to-date, and equip your employees with the knowledge they need to work in a mining environment. Even without experience, these courses are clear enough for new employees and visiting contractors to understand the dos and don'ts of working in a mining environment.

You must provide the miner with no less than 24 hours of training in the following subjects, which must also address site-specific hazards: An introduction to the work environment, including a visit and tour of the mine, or portions of the mine that are representative of the entire mine (walkaround training). The method of mining or operation utilized must be explained and observed.

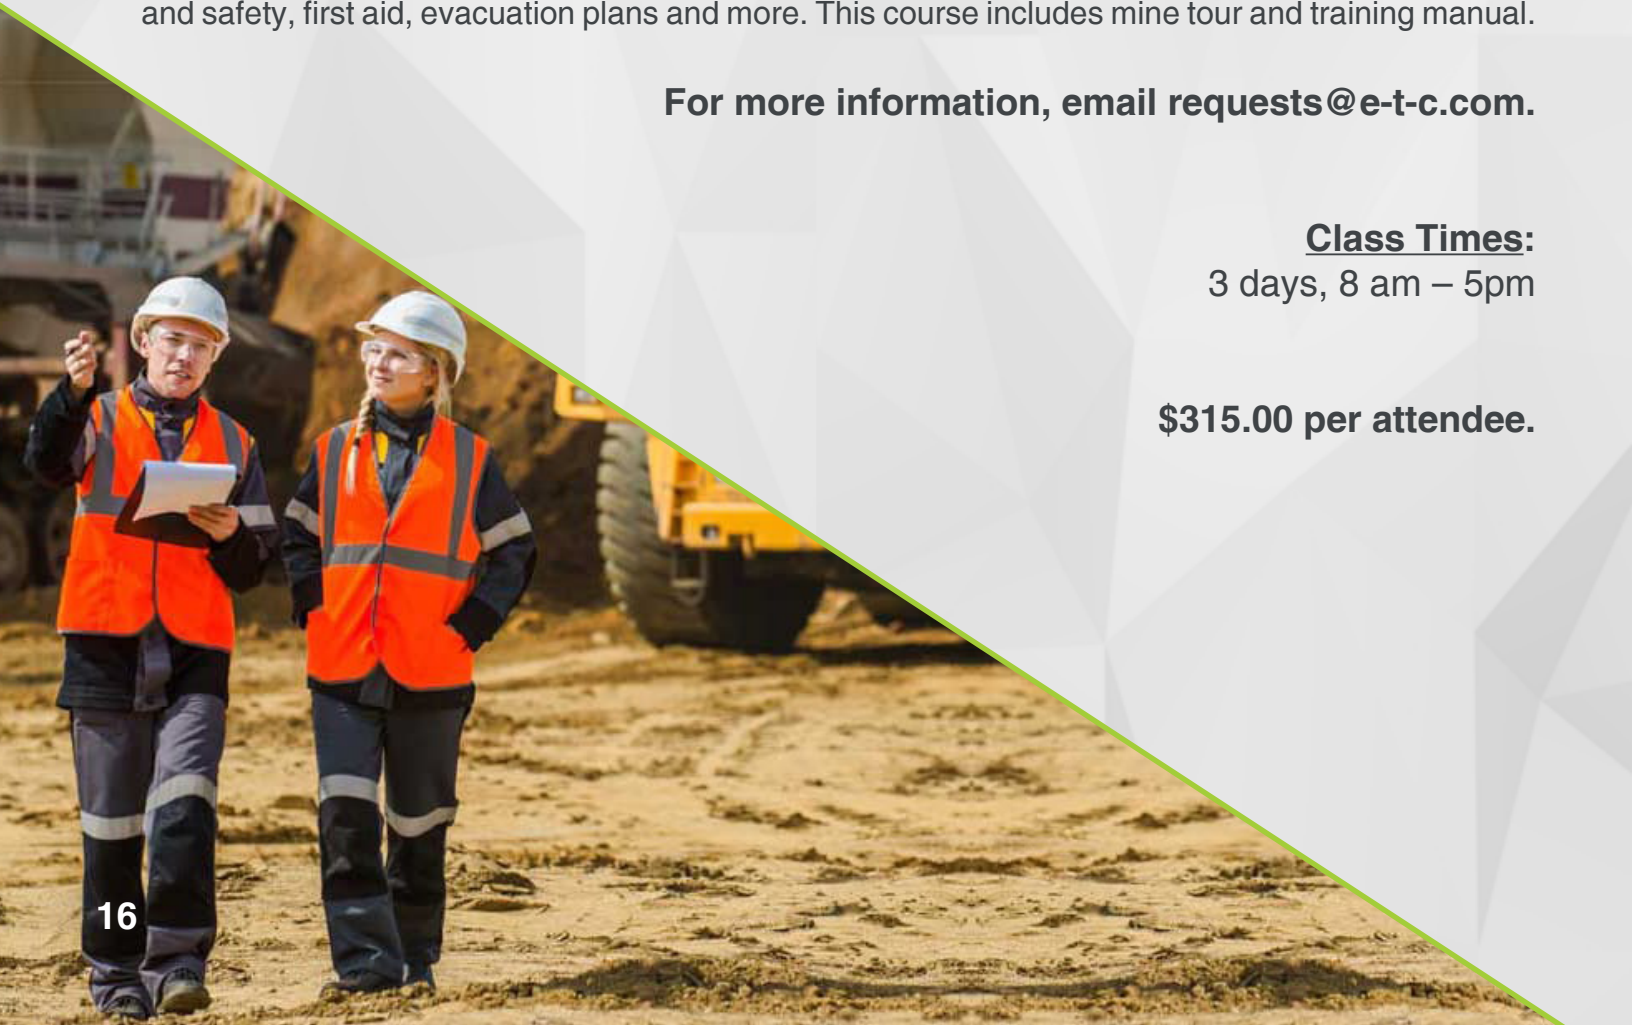

This course meets MSHA requirements for the initial training of new personnel without previous mining experience. Classroom instruction must be followed by an on-site introduction to the work environment per 30 CFR 48.25(b)(4). The curriculum includes: Rights of Miners, introduction to the work environment, transportation/ground control, communication systems, respiratory devices, hazard recognition, health and safety, first aid, evacuation plans and more. This course includes mine tour and training manual.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

3 days, 8 am – 5pm

**\$315.00 per attendee.**

# MSHA Surface Annual Refresher

Fulfills recertification requirements of the U.S. Department of Labor, Mine Safety and Health Administration, 30 CFR Part 48(b). This is a refresher class, attendee must have and bring their current 5000-23 to qualify for this class. Training must be completed by the end of the same month training was completed the previous year.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

1 day, 8 am – 5 pm

**\$125.00 per attendee.**

## Arc Flash NFPA 70E

This course is intended for individuals who will be working with electricity. Students attending this 8-hour course will learn safe work practices and procedures to be able to recognize dangerous situations and avoid hazards before an incident occurs. They will learn the safe approach distances to exposed electrical conductors and by the end of class they'll be able to determine the proper personal protective equipment for any working condition encountered. Every student will leave this class with a much better understanding of the hazards they encounter every day and a new respect for electricity. Class includes current edition of "70E Standard for Electrical Safety in the Workplace."

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**  
1 day, 8 am – 5 pm

**\$425.00 per attendee.**

# OSHA Competent Person Excavation Trenching & Shoring Training

Course is designed for individuals seeking certification for trenching and excavation operations in compliance with OSHA regulations specified in 1926 Subpart P. Excavating and trenching have a number of important applications. Participants will learn the technical information and skills necessary to recognize, evaluate, and control the unique health and safety hazards encountered with working in and around trenching and excavation operations including: scope, application, and definitions, specific requirements including assigning a competent person, who is responsible for classifying soil, inspecting protective systems, and monitoring the site for new or additional hazards, hazards including cave-ins, exposure to falling loads, electrocutions, oxygen deficiency, falls, and hazardous atmospheres, protective systems, soil classification, sloping and benching, aluminum hydraulic and timber shoring, shoring alternatives and protective systems selection.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

1 day, 8 am – 12pm

**\$200.00 per attendee.**

# OSHA Confined Space

Confined Space training for Entrants / Attendants / Supervisors / Competent Persons - This training is required for persons supervising confined space entry, employees entering and working within a confined space, and those persons tasked with assisting with the entry, but not actually entering themselves. Participants will learn the technical information and skills necessary to recognize, evaluate, and control the unique health and safety hazards encountered with confined space entry work. Topics include: regulatory review, elements of confined space programs, confined space identification and evaluation, permit information, hazard recognition, atmospheric testing, hazard control (ventilation, cleaning and purging, fall protection and retrieval systems, non-entry rescue, etc.), personal protective equipment and entry equipment.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

1 day, 8 am – 2pm

**\$265.00 per attendee.**

# OSHA Fall Protection

Falls are among the most common causes of serious injuries and fatalities in the workplace. This course is designed for individuals with frequent exposure to fall hazards. Students learn the necessary skills to identify and avoid hazards associated with elevated work areas. Students are encouraged to bring their own fall protection equipment to class.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

8 am – 4 pm

**\$265.00 per attendee.**

# OSHA HAZWOPER 24-Hour Limited Task Worker

A three-day, 24-hour course designed for workers who are on site only occasionally for a specific limited task and who are unlikely to be exposed over permissible or published exposure limits and who will not be wearing respiratory protection. Topics include: site safety plans; physical and health hazards; PPE; work practices; engineering controls; medical surveillance; site control; and decontamination. This course satisfies the requirements of 29 CFR 1910.120(e)(3)(ii) and (iii).

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**  
3 days, 8 am – 5 pm

**\$575.00 per attendee.**

# OSHA HAZWOPER 40-Hour

This training course is a five-day, 40-hour program of intensive training to fulfill OSHA regulatory requirements listed within Title 29 Code of Federal Regulations 1910.120(e)(q) for General Site Workers. This course is intended for personnel who are routinely involved in the clean-up and handling of hazardous materials. Our HAZWOPER training include topics such as scope, application, and definitions; safety and health programs; site characterization and analysis; site control; training; medical surveillance; engineering controls, work practices, and personal protective equipment; monitoring; site safety and health plans; drums and containers; decontamination and on-site emergency response. This course includes demonstrations of proper PPE donning, container handling and decontamination procedures. We also offer custom training where we come to you!

It is incredibly important for your employees to have the necessary training that is not only recommended, but also required by state and national regulatory agencies. While avoiding fiscal penalties is an added bonus, keeping your employees safe in the field is the ultimate goal. Equipping your employees with the proper training and information to maintain safe work practices is part of being a great business owner. Your employees will value your efforts in ensuring they return home just as they came.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**

5 day, 8 am – 5 pm

**\$760.00 per attendee.**

# OSHA HAZWOPER Annual Refresher

A one-day, 8-hour course designed as HAZWOPER refresher training for those individuals who have completed the initial 40-hour General Site Worker or the 24-hour Occasional Site Worker course. This annual training is required within one year of the initial certification or last refresher course. This course discusses and reviews changes in Federal and State regulations as well as relevant, upcoming legislation. In addition, developments in state-of-the-art practices and technologies, as well as key aspects from the initial training are discussed. After completion of this course, participants will have their certification extended for an additional year. This course satisfies the annual refresher training requirements of Title 29 Code of Federal Regulations, Part 1910.120(e)(8).

This course includes lecture, team workshops, desktop scenarios, and hands-on exercises.  
Refresher Training: Annual 8-Hour refresher.

**For more information, email [requests@e-t-c.com](mailto:requests@e-t-c.com).**

**Class Times:**  
1 day, 8 am – 5 pm

**\$265.00 per attendee.**

# OSHA HAZWOPER Site Supervisor

29 CFR 1910.120(e)(4) This one time course is for anyone with supervisory or managerial responsibilities for others at hazardous waste operations. OSHA states that supervisors must have a minimum of 8-hours specialized training beyond the initial 24-hour or 40-hour HAZWOPER and above those whose activities they may direct.

Prerequisite: Successful completion of a HAZWOPER Initial 24-hour Occasional / Limited Task Worker or 40-hour General Site Worker course.

**For more information, email requests@e-t-c.com.**

**Class Times:**

1 day, 8 am – 5 pm

**\$305.00 per attendee.**
